

SPOT

SPOT is a very easy to use device that features three key functions that enable users to send messages to emergency responders, and emails to pre-loaded friends and family using Google Maps™ to show an image of your current location and you can show tracking too:

911 Button Via satellite calls 911 in the USA. – The 911 operators, from your SPOT's transmission data, know your exact location and immediately send the information to the Search & Rescue in whichever country you have activated your SPOT.

SPOT sends one message every 5 minutes until power is depleted or 911 is cancelled.

HELP Button Ask for Help – SPOT sends a request for help to friends and family that you have previously loaded and gives your exact location. SPOT sends one message every 5 minutes for one hour or until Help is cancelled. One of the features that makes SPOT unique is that you could make your alarm monitoring service or an answer service one of the 10 contacts and then you get the message from them by phone.

OK Button – SPOT lets your previously loaded contacts know where you are and that you're okay. SPOT sends three identical messages to the SPOT service for redundancy. Immediately one of these messages is received, the others are cancelled.

SPOT

Track Progress – Send and save your location and allow contacts to track your progress using Google Maps™. SPOT sends one message every 10 minutes for 24 hours or until SPOT is powered off.

Coverage-SPOT works around the world, including virtually all of North America, South America, Europe and Australasia, Northern Africa and Northeastern Asia, and hundreds or thousands of miles offshore of these areas. See coverage on www.findspot.co.nz for maps and current coverage.
